UCR Fall 2015**

Class: Olmsted Hall (OLMH) 1208; MWF 9:10-10:00 a.m.

Communication Policy: Please make sure you read your email daily for notices and communications from your instructor.

Required Textbook: Mishkin: The Economics of Money, Banking and Financial Markets, 11/E MyEconLab by Frederic Mishkin; ISBN-10: 0134047346.

Technology requirement to submit assignments and exams online in this class:

Please read and plan ahead

Students are expected to be fully responsible for ensuring access to a high-speed stable Internet system to submit assignments or exams online.

For this purpose, UCR has labs available to students equipped with computers where you could work if needed. Go to <http://cnc.ucr.edu/scs/complabs.html> for more details on locations and hours.

Therefore, each student has plenty of resources available to submit their work on time. Please, plan ahead. Given that each student has plenty of time to complete their work online, utilizing an appropriate system as specified in this section of the syllabus, there will be no makeup or extra credit provided. Please, plan ahead.

I. Course Description:

Covers the basic theories of modern monetary systems. Explores money, credit, and interest rate behavior; financial intermediation and central banking; and methods and objectives of monetary and regulatory policy.

II. Goals and Objectives:

This course will introduce students to the larger world of money, banking, finance and the global financial system. It will explore how the financial system works and what type of policies governments implement to deal with financial instability. After this course students should be conversant in issues concerning the global financial system, the evolving instability of it, the roots of it, and potential policies to mitigate the deleterious effects of financial instability on the economy.

III. Course Expectations:

Attendance to a section: Attendance to a section strongly suggested because your TAs will help you reinforce the concepts covered in homework assignments and exams.

Homework assignments: The four homework assignments, to be found in MyEconLab, are designed to reinforce concepts and to help students prepare for the exams. The format and

content in the assignments will be similar to the exams. Therefore, it is a good idea to complete the assignments.

Final exam: The final exam will be available in MyEconLab for a number of days. Once you begin an exam you will have five hours to complete the final exam. The format and content of the exams are similar to the homework assignments. Please see the class schedule for details.

Make-up Work/Exams: Given that I am allowing ample time to complete the homework assignments and the exams, there will be no valid excuses to miss any of them. Please, plan ahead.

IV. Assessment and Evaluation:

Assignment	Percentage of grade
Homework assignments (4 of them)	70%
Final exam	30%

Grade Scale

95–100	A	71–74	C
